MoonPunk Token (MPUNK) Description and Utility

We will launch the very first native token for the MoonPunk platform, MPUNK. The funds from this IDO will allow us to start development on our platform and first NFT. The tokenomics for MPUNK are below:

Total Supply - 100,000,000 MPUNK
IDO Pricing - 1 BNB = 100,000 MPUNK

Token Presale - 90,000,000 (90% of total supply)
Liquidity Locked Until November 2023 - 60,000,000 (PancakeSwap, 60% of total supply)
DEX Initial Pricing - 1 BNB = 95,000 MPUNK

5% of each MPUNK transaction will be burned
2% of each MPUNK transaction will goes to the MPUNK treasury wallet to fund reoccurring expenses for infrastructure

Developer Wallet will hold 10,000,000 MPUNK *AT LEAST* until November 2024.

Dev Wallet – 0x3a6d2B8B8136af39415418e668Ad0Db3098b0393
Treasury Wallet - 0xEc6A255958E677C02Ae582899Fa8155B55b8830f

MoonPunk NFT

IDO holders of MPUNK will be airdropped an NFT for free as a thank you for their investment before the NFT is released. After that, NFTs will then be available for the public to mint. The exact tokenomics for the NFT will be determined at a later time and will be open for discussion with the MoonPunk Commnuity.

MoonPunk Platform Vision

We will build a crypto-gaming-centric platform with a built in DEX and NFT marketplace, but that is just the beginning. Holders of our platform's MPUNK tokens or MoonPunk NFTs will be granted exclusive access to launch IDOs and create NFTs using the MoonPunk platform, just pay the gas fee. Additionally, holders will be granted access to exclusive Discord groups so that they can keep up with IDOs, IGOs, and NFT launches on the MoonPunk platform.

Non-holders will still be able to launch IDOs and create NFTs for a fee, but it will be noted within the platform whether or not the minter/creator is a holder of MPUNK or an MoonPunk NFT. This way, we hope to use MPUNK as a utility token to lower the barrier for entry for startups *AND* to create trust among potential investors.

Why BSC?

It is our belief that the platform with the lowest barrier for entry today is BSC. That said, BSC is just our platform's first chain. Once the platform is completely launched on BSC, we will begin development of a similar platform on Solana.

Conclusion

Together, we can build a simple and cohesive platform to the crypto-gaming space. We look forward to learning, growing, and gaming with you!
